+ EXPERIENCES

From 2011
IT CONSULTANT
DEV TEAM MANAGER

My mission is to improve the code quality and the efficiency of the developers team. I am technically responsible of 15 backend and frontend developers.
I have developed a Facebook Framework to ease the project into tabs, CakePHP Plugins for auth and environments management for backend developers and we are currently develop with a lead developer the second version of our frontend Javascript Framework based on RequireJS and Backbone.
I'm very interested by the recent utils, architectures and working methods as NodeJS, Design Patterns and Test Driven Development.
Finally I have also the skills to setup Apache, Varnish or NGINX servers and every commands must be run on Linux platforms.
